

Placement Rate Methodology of ABHES

Job Placement Rate Calculated for LVN Program Completers: 84%

Reporting Period: Students who completed July 1, 2016 - June 30, 2017

A placement is (1) an active service provided for students in their search for employment and (2) a graduate of a program who is employed in the field or related field of training. The placement rate was determined by using the ABHES required method of calculation for the reporting period July 1 through June 30, as follows:

$$\text{Placement Rate} = \frac{F + R}{G - U}$$

F = Graduates placed in their field of training

R* = Graduates placed in a related field of training

G = Total number of graduates

U** = Graduates unavailable for placement

*Related field refers to a position wherein the graduate's job functions are related to the skills and knowledge acquired through successful completion of the training program.

**Unavailable is defined only as documented: health-related issues, military obligations, incarceration, continuing education status, or death.

This rate is based upon program completers who were employed prior to December 1, 2017 and who were employed for at least 15 days before December 1, 2017.

Important Note: graduates pending required credentialing/licensure in a regulated professional required to work in the field and, thus, not employed or not working in a related field as defined above, are reported separately in the ABHES Annual Report.

Employment (Placement) Rate Methodology of TWC

Employment Rate Calculated for LVN Program Completers: 86%

Reporting Period: Students who completed September 1, 2016 – August 31, 2017

The employment rate is determined by using the TWC required method of calculation, for the reporting period September 1 through August 31, as follows:

$$\text{Employment Rate} = \frac{\text{Employed (Placed + Not Placed)}}{\text{Completers - Unavailable}}$$

- Completers = The number of students who completed a vocational training program during the reporting period
- Employed = The number of completers who were employed in an occupation for which they were trained by the program
- Placed = The number of students who completed the program and who were actively assisted in obtaining gainful employment related to the training received. Actively assisted means the school arranged an interview, contacted potential employers, and/or brought potential employers to the school to assist the Completer become gainfully employed.
- Not Placed = The number of students who completed the program and obtained gainful employment related to the training received without the active effort or assistance of the school.
- Unavailable = The number of students who completed the program but who were unavailable for employment due to entry into another post-secondary education program or the military full-time, incarceration, or death.

This rate is based upon program completers who were employed prior to December 1, 2017 and were employed for at least 15 days prior to December 1, 2017.
